DETAILED ACTION

Applicant's amendments filed December 22, 2003 have been entered. After the amendments, the only pending claim is claim 16. Claims 1-7 and 15 have been cancelled.

The arguments filed December 22, 2003 along with the evidence shown in declaration filed March 23, 2003 have been considered and are found persuasive to withdraw the outstanding rejection under 35 USC 103(a).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 16 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5 of US Patent 6,884,793 ('793).

Although the conflicting claims are not identical, they are not patentably distinct from

Art Unit: 1617

each other because the scope of the instant claims and that of the conflicting claims are substantially similar although not identical. The scope of the claims in '793 actually falls within the scope of the instant claims. In other words, the scope of the claims in '793 is narrower than that of the instant claims and therefore, claim 16 of the instant application is properly rejected under the obviousness double patenting rejection.

No claim is allowed.
